\* cutting lengths requiring optional sizes

Details of safety guards

Road transport with folder cross bar

The Forage Harvested mod. 343 is the new tractor mounted Forage Harvested with high performances, it is a valid answer to the needs of the modern farm. It is designed for tractor from 50 to 100 HP. Big output, minimum power absorption, great reliability, rasy and reduced maintenance. With its several accessories, on request, it is a complete machine that meets any needs of the customers.

The Forage Harvester 343 is supplied with main folding cross-bar by hinge as a standard issue.

It has the advantage to reduce over-all dimensions during the trasport, by increasing safety and allowing the transit through narrow roads. The hydraulic device for rotation of discharge spout is also as a standard issue on every machine
